

Health Behaviors During Holidays

Welcome! This short survey explores how traditional holidays influence everyday health behaviors such as diet, sleep, and stress. The data will be used for a coursework assignment and will be analyzed only in an aggregated form. Participation is anonymous, and the survey does not collect any personal identifiers. Estimated completion time: about 2 minutes. Thank you for your time!

In which country do you currently live?

What is your age group?

- ☐ 18-29
☐ 30-44
☐ 45-59
☐ 60+
